Professional Summary

Full-stack Software Engineer with approximately four years of professional experience building .NET and TypeScript applications. Strongest in ASP.NET Core, React/Next.js, EF Core and PostgreSQL.

Technical Skills

- Languages: C#, TypeScript, JavaScript, Python
- Frameworks: .NET, ASP.NET Core, React, Next.js, React Native, Expo, Django
- Data and identity: PostgreSQL, EF Core, ASP.NET Core Identity, Keycloak, OIDC
- Cloud, DevOps and testing: Azure, Bicep, Azure DevOps, GitHub Actions, xUnit, Git

Professional Experience

Software Engineer | University of Nottingham — Digital Research Service

October 2022–Present

Develop software across research projects using C#/ASP.NET Core, TypeScript/React and PostgreSQL, spanning web, mobile and data-driven applications.

- Developed configurable and versioned workflows across ASP.NET Core services, React/Next.js interfaces and EF Core data models.
- Refactored CSV imports for validation and preview; added PostgreSQL full-text search.
- Implemented access-control features with ASP.NET Core Identity and Keycloak, and built React Native/Expo case and follow-up survey flows.
- Added PostgreSQL-backed xUnit tests and adapted Azure/Bicep application settings and Azure DevOps/GitHub Actions workflows.

IT and Data Support Officer | Nottingham University Hospitals NHS Trust

January 2022–October 2022

- Supported a Perl/MySQL informatics system and contributed to a Next.js/Directus educational portal.
- Developed data collection forms and produced reports, checking extracts to resolve data discrepancies.

Data and Compliance Officer / Tutor | Enable

November 2017–January 2022

- Maintained the management information system, investigated data errors and prepared reports alongside compliance and IT tutoring work.

Education

- MSc Computer Science — Nottingham Trent University, 2018
- BSc Computer Science — University of Hertfordshire, 2017
- HND Computing — Ealing, Hammersmith & West London College, 2016
